

Engler Machine & Tool returns as 2019 Sprints On Dirt heat race sponsor

FORT WAYNE, IN (February 18, 2019) – Engler Machine & Tool will once again be a Sprints On Dirt primary heat race sponsor in 2019.

Sprints On Dirt was instrumental in the resurgence of payouts for heat races in sprint car racing and Engler Machine and Tool helped make it happen. In 2019, SOD heat race winners and second place finishers will receive cash with third and fourth finishers receiving product or certificates.

John Naida, Sprints On Dirt Director of Operations, announced the program, stating: “Tim (Engler) has deep roots in open wheel racing and Engler Machine & Tool has been a staunch supporter of Sprints On Dirt

for quite
some time. We are honored to be able to
partner with such a well-respected leader in motor sports.”

Engler Machine & Tool is recognized today for its
championship-winning
fuel injection systems powering top name competitors to
countless wins. Engler-powered
teams are off to a fast start in 2019 in sprints, tractor
pulling, midgets, and
micros. A new Engler stock throttle body
mechanical injection is rapidly receiving approval for use in
600 micro classes
across the country and is sure to be a favorite.

**MAHLE Aftermarket Hard
Charger Award announced for**

SOD in 2019

MAHLE

Driven by performance

FORT WAYNE, IN (February 14, 2019) – Long-time Sprints On Dirt partner MAHLE Aftermarket has returned for 2019 as the title sponsor of the SOD hard charger award.

The MAHLE Aftermarket Hard Charger Award is a new role for the company. Previously MAHLE was sponsor of the MAHLE/Clevite Short Track Challenge, then the MAHLE/Clevite Beyond Limits Challenge from 2016 through 2018.

The MAHLE Aftermarket Hard Charger in each 2019 Sprints On Dirt race will award \$50 to the driver who advances the most positions from their original starting position in the A-main. 2018 SOD Champion Chad Blonde was hard charger four times to lead all drivers last year.

Ted Hughes, MAHLE Aftermarket Inc., Marketing North America stated:

“The MAHLE commitment to performance on tracks and roads

around the world
is evident in all of the vehicles we help power – nowhere is
this more evident
than in great American grass roots series like Sprints on Dirt
where the
passion of the American racer is captured week in and week
out.”

John Naida, Sprints On Dirt Director of Operation, announced
MAHLE’s return, stating: “SOD is proud of our long-time
partnership with
MAHLE. The MAHLE brand has provided high
quality products for several generations of racers and SOD is
honored to share
our success with MAHLE once again.”

MAHLE products are used in every second automobile around
the world; this is no wonder since the company is one of the
30 largest
automotive suppliers and one of the top 3 systems providers.
Almost all
automobile and engine manufacturers work with MAHLE when
dealing with piston
systems, cylinder components, valve trains, air management,
and fluid
management systems. The MAHLE
Aftermarket division transfers this knowledge to our partners
in retail, repair
shops, and engine rebuilders—and of course into the
corresponding products.
